

Required materials for BIO210, 2017 course

The required reading for the 2017 course will be the 5th edition of *Evolutionary Analysis* by Herron & Freeman.

There will be three virtual laboratory simulations from SimBio which you will be required to purchase licenses for (total cost USD15). You will get the instructions for purchasing access (registering) later.

Finally, there will be a few required videos to watch, and there may be a few additional readings (probably as pdf files). These will not cost you anything.
