

# Syllabus for GEOV352 - Field Methods in Petroleum Geology

---

29.11.2016 - Christian Haug Eide, Jonny Hesthammer

There is no mandatory reading list for this course, but background knowledge in structural geology and sequence stratigraphy will be an advantage.

The following sections are recommended reading:

- *Chapters 7-10 in Coe, Angela L. (ed.). The sedimentary record of sea-level change. Cambridge University Press, 2003.*
- *Chapter 8 in Fossen, Haakon. Structural geology. Cambridge University Press, 2016.*

In addition to this, multiple e-learning modules will be part of the pre-field course workshop.
