

Litteraturliste på oral biologi (OD1ORBI2) våren 2019

Oral biologi

- forelesningene til Päivi Kettunen
- forelesningsnotatene
- histologikurset
- kursjournal

Pensumboken:

Berkovitz, Holland, Moxham: Oral Anatomy, Histology and Embryology. 5th edition 2018. Elsevier.

Følgende kapitler:

1. The appearance of the oral cavity
4. Vasculature and innervation of the mouth
6. Functional anatomy
7. Enamel
8. Investing organic layers on enamel surfaces
9. Dentine
10. Dental pulp
11. Cementum
12. Periodontal ligament
13. Alveolar bone
14. Oral mucosa
15. Temporomandibular joint
16. Salivary glands
21. Early tooth development
22. Amelogenesis
23. Dentinogenesis
24. Development of the dental pulp
25. Development of the root and periodontal ligament
26. Development of the dentitions
27. Aging and archeological and dental anthropological applications of tooth structure

Oral fysiologi

- forelesningene til Ellen Berggreen
- forelesningsnotatene

-Artiklene:

a) Orchardson R and Cadden SW
An update on the physiology of the dentin-pulp complex.
Dent Update 2001 28(4): 200-209.

b) Bardow A, Lynge Pedersen AM and Nauntofte B: Saliva
Clinical physiology, p. 17-35 (side 30-35 utgår: salivas bufferkapasitet..)

27.11.2018 Päivi Kettunen, emneansvarlig, Institutt for Biomedisin

Mikroskopikurset

På mikroskopikurset trengs det en kursjournal (ikke enkelte A4 papir som er stiftet sammen).

F.eks. Akademika selger gode kursjournaler:

INSPIRA A5 (eller A4), Black hard cover notebook (plain white sheets (**not lined or squared**), 96 sheets (PA-8096A5U/7071057003347)
