

Pensum (Literature List) for Geov112 (Fall 2017)

The books used in this course are:

- The Solid Earth (second edition) by C.M.R. Fowler (published by Cambridge University Press, 2005)
- MATLAB Demystified by David McMahon (published by McGraw Hill, 2007)

Both these books can be bought in Studia.

Matlab:

McMahon: Chapters 1-4

Plate tectonics:

Fowler: Chapter 2

Magnetics and plate motions:

Fowler: Chapter 3

In addition to this the students are supposed to be familiar with material presented in the exercises that will be handed out during the course.

Henk Keers and Stephane Rondenay
