The books used in this course are:

- MATLAB Demystified by David McMahon (published by McGraw Hill, 2007)

Both these books can be bought in Studia.

**Matlab:**

McMahon: Chapters 1-4

**Plate tectonics:**

Fowler: Chapter 2

**Magnetics and plate motions:**

Fowler: Chapter 3

In addition to this the students are supposed to be familiar with material presented in the exercises that will be handed out during the course.

Henk Keers and Stephane Rondenay
